### **Systems Engineer**

Location: Charleston, SC (Onsite/Hybrid as required)

Clearance: Active or eligible DoD clearance required

We're looking for a Systems Engineer to support a DoD program focused on secure system integration and ongoing operations. In this role, you'll help solve complex technical problems, support system design efforts, and work closely with engineers, operations, and program teams.

You'll apply systems engineering best practices to integrate and support secure environments, assist other engineers as needed, and contribute to planning and documentation. The role involves working with Windows and Linux systems, containers, and virtualized environments, as well as enterprise networking and security technologies.

### **Qualifications:**

- 5+ years of systems engineering experience
- Experience with system integration, requirements, and verification
- Familiarity with DoD environments and standards
- Strong communication and documentation skills

### **Help Desk/Information Technology Service Management**

Location: Charleston, SC

Clearance: Active or eligible DoD clearance required

We're looking for a Help Desk / ITSM Support Specialist to support a DoD program by providing Tier I/II technical support and IT service management. This role serves as the primary point of contact for end users, ensuring timely resolution of incidents, service requests, and system issues in accordance with established ITSM processes and DoD standards.

### **Qualifications:**

- 5+ years in project controls or program management support
- Experience with earned value management (EVM) and reporting
- Familiarity with DoD contracts and program oversight
- Strong analytical and organizational skills

### **Tier 1-2 Support Engineers**

Location: Charleston, SC

Clearance: Active or eligible DoD clearance required

We are seeking a Support Engineers to support a DoD program by defining system requirements, analyzing performance, and helping improve application and system functionality. In this role, you'll work closely with technical and non-technical teams to translate mission needs into clear system specifications and solutions. You'll contribute across the full application lifecycle—requirements definition, design support, testing, documentation, and system improvements—while solving complex problems with an understanding of system constraints, performance, and operational needs.

#### **Qualifications:**

- 3+ years of systems analysis experience
- Experience supporting DoD systems or programs
- Strong problem-solving and documentation skills
- Ability to collaborate across technical and business teams

### **Model Based Systems Engineer (MBSE)**

Location: Charleston, SC

Clearance: Active or eligible DoD clearance required

We are seeking a Model-Based Systems Engineer to support a DoD program by using modeling, simulation, and analytical tools to inform system analysis and decision-making. This role supports planning, exercises, demonstrations, and training activities across live, virtual, and constructive environments.

You'll provide guidance on the effective use of simulation models, support operational and training events, and work with cross-functional teams to ensure simulations align with mission and system objectives.

#### **Qualifications:**

- 5+ years of experience in modeling and simulation
- Experience supporting DoD or defense programs
- Familiarity with simulation tools and analytical methods

### **Computer Aided Design (CAD) Drafter**

Location: Charleston, SC

Clearance: Active or eligible DoD clearance required

We are seeking a CAD Drafter to support a DoD program by producing accurate, high-quality CAD technical drawings in support of mission and operational requirements.

In this role, you'll create and update CAD drawings and technical graphics, integrate visuals into program deliverables, and support technical documentation and training materials. You'll work independently on complex drafting tasks and collaborate with engineers and stakeholders to ensure products meet quality, schedule, and program needs.

### **Qualifications:**

- 5+ years of experience in graphics, CAD, or visual communications
- Experience supporting government or technical programs
- Proficiency with industry-standard graphics and design tools
- Ability to translate complex concepts into clear, usable visuals

### **Logistics Analyst**

Location: Charleston, SC

Clearance: Active or eligible DoD clearance required

We are seeking a Logistics Analyst to support a DoD program by developing and implementing logistics documentation, plans, and data in support of complex information systems. This role supports system fielding, sustainment, and post-production activities across the program lifecycle.

You'll prepare and maintain logistics support documentation, manage logistics databases and inventories, and apply logistics principles to solve program-specific support challenges. The role requires independent work and leadership in implementing logistics disciplines across the program.

### **Qualifications:**

- 5+ years of logistics analysis or integrated logistics support experience
- Experience developing logistics plans and support documentation
- Experience supporting fielding and sustainment of complex systems
- Knowledge of logistics databases, inventory management, and sustainment processes
- Experience supporting DoD or government programs

## Configuration Management Specialist

Location: Charleston, SC

Clearance: Active or eligible DoD clearance required

We are seeking a Configuration Management Specialist to support a DoD program by managing configuration planning, change control, and baseline integrity across system and software documentation.

In this role, you'll maintain configuration baselines for requirements, designs, software, and related documentation; manage configuration change processes; track and report configuration status; and support configuration audits to ensure compliance. You'll help ensure that only approved and validated changes are implemented throughout the system lifecycle.

## **Qualifications:**

- 5+ years of experience in configuration or data management
- Experience supporting configuration planning, change control, and audits
- Ability to track and report configuration status across systems and documentation
- Experience supporting DoD or government programs
- Strong attention to detail and documentation skills

## Program Specialist (FMS)

Location: Charleston, SC

Clearance: Active or eligible DoD clearance required

We are seeking a Foreign Military Sales (FMS) Program Specialist to provide senior-level expertise supporting international defense and security cooperation programs. This role supports complex FMS activities by applying deep subject matter knowledge to system analysis, integration, documentation, training, and program execution. You'll advise on complex and specialized FMS issues, support program planning and implementation, and develop technical reports, studies, briefings, and presentations. The role requires independent judgment, strong analytical skills, and the ability to communicate effectively with technical teams, program leadership, and international stakeholders.

## **Qualifications:**

- 5+ years of experience supporting Foreign Military Sales or international defense programs
- Demonstrated subject matter expertise in FMS, security cooperation, or defense acquisition
- Experience providing analysis, technical documentation, and program-level recommendations
- Ability to prepare and deliver briefings, training, and presentations
- Experience supporting DoD or government programs

### **Process Improvement Analyst**

Location: Charleston, SC

Clearance: Active or eligible DoD clearance required

We are seeking a Process Improvement Manager to support a DoD program by analyzing organizational processes and advising on improvements to operations, workflows, and management practices.

In this role, you'll evaluate work methods, organizational structures, manpower utilization, and management controls, and provide recommendations that improve efficiency and effectiveness. You'll support leadership decision-making through analysis, documentation, reporting, and briefings.

### **Qualifications:**

- 5+ years of management, operations, or organizational analysis experience
- Experience supporting DoD or government programs
- Strong analytical, reporting, and briefing skills
- Ability to support leadership decision-making

### **Documentation/Knowledge Manager**

Location: Charleston, SC

Clearance: Active or eligible DoD clearance required

We are seeking a Documentation / Knowledge Manager to support a DoD contract by developing, maintaining, and managing technical and program documentation for both technical and non-technical audiences.

In this role, you'll gather and analyze technical information, translate complex concepts into clear, usable documents, and maintain an organized documentation library. You'll support documentation standards, version control, and coordination across technical and engineering teams.

### **Qualifications:**

- 8+ years of technical documentation experience
- Familiarity with DoD documentation standards
- Strong writing, editing, and version control skills
- Experience supporting technical or engineering teams
